

**Join Western Cuyahoga Audubon as we go out into nature and
restore biodiversity, one plant at a time**

Saturday, May 7, 2011 1:00 - 4:00 pm
Wendtwood, Lorain County
Along the west branch of the Rocky River

RSVP by calling: 440-759-8220, or email Terri Martincic at naturenutATwowway.com a map will be forwarded to participants.

Western Reserve Land Conservancy and Cleveland Museum of Natural History staff will join us on this privately owned conservation easement property. Enjoy a wonderful hike as we scout for Garlic Mustard. Hopefully we'll see the Trumpeter Swans.

Saturday, April 30, 2011 11:00am-2:00pm

[Bacon Woods, Lorain County Metro Parks](#)

We will celebrate HerbFair with Lorain Metroparks. Bacon Woods is an amazing place with many types of spring wildflowers. Join us in our efforts to maintain the diversity.

August 6, 2011, Saturday
1:00 pm - 3:00 pm
[Look-about Lodge](#), Cleveland Metroparks

Remove Japanese barberry.

Take 480 east to 422 (near 271). Quickly exit at Miles Road. Turn right (east) onto Miles. Look About Lodge will be on the right.

DID YOU KNOW?

Lesser Celandine is quickly taking over the Rocky River Metroparks and has invaded the Vermilion River, Doan Brook, and Chagrin River areas. It's the beautiful yellow flower in April that really doesn't belong in Ohio. It's a real tough plant to get rid of, click on the link to learn more:

<http://www.fosc.org/CelandinePartI.htm>

BUY NATIVE PLANTS

Pick up a [Native Plant](#) card at one of our Programs.

For information from The Cleveland Museum of Natural History on native and invasive plants. [Click here](#)

OHIO INVASIVE PLANTS COUNCIL

For more information about invasive plant species see the Ohio Invasive Plants Council website at <http://www.oipc.info/>.

DO YOU KNOW ABOUT GIANT HOGWEED?

Want to know more about the alien and noxious plant species, Giant Hogweed. [Click here for a fact sheet](#) distributed by Michigan. Giant Hogweed has been found in Ohio too.

DO YOU KNOW ABOUT OUR NATIVE BUTTERFLY?

Did you know that the **native West Virginia White** butterfly die when it eggs are laid on Garlic Mustard. The West Virginia White looks like the familiar Cabbage Moth but the West Virginia White is found in the woods. For more information about this native butterfly [click here](#).

FOR INFO ABOUT WEEDERS IN THE WILD

Contact Terri Martincic for any questions regarding Western Cuyahoga Audubon's Weeders-in-the-Wild at 440-759-8220 or email: naturenutATwowway.com.

"Never doubt that a small group of thoughtful, committed citizens can change the world. Indeed, it is the only thing that ever has."- Margaret Mead
